Transforming business, making life simple

# Transforming Accounts Payable

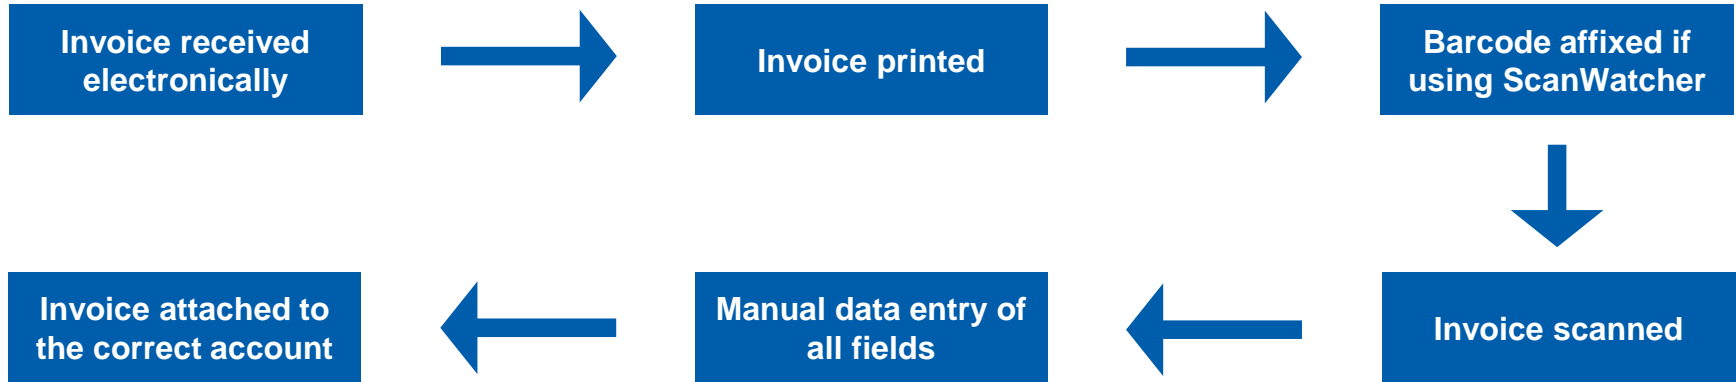

# Transforming AP

- Accounts Payable should not just “process invoices”
- Technology enables finance to play a central role in decision making, not data entry
- Streamline redundant manual processes with software that automates and drives a paperless office

# Typical invoice process

*Takes time and can result in manual errors*

# Automating AP Invoice Processing

1. Invoice received to central mailbox
2. Invoices moved to a processing folder
3. Fields automatically converted for import
4. Imports automatically processed

You only need to manage exemptions

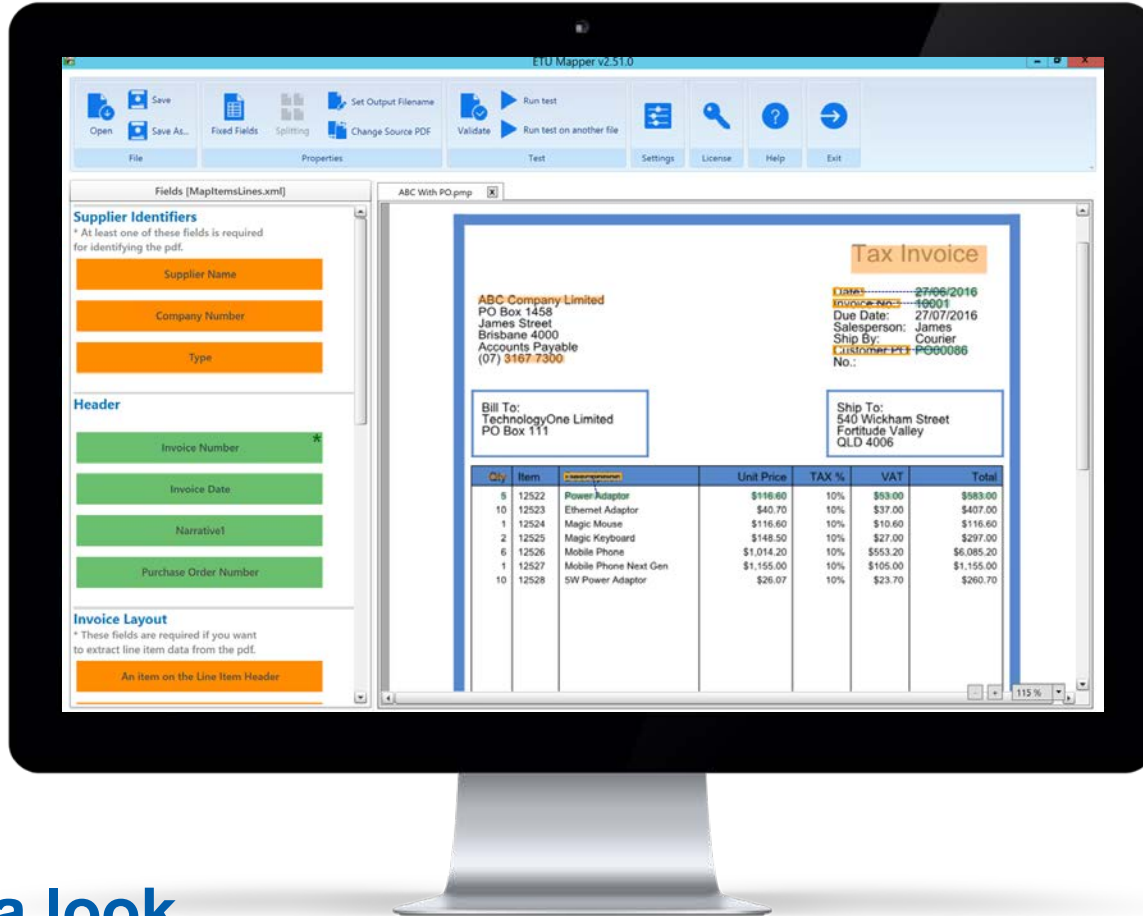

# Components

- PDF Mapper
- PDF DragIn
- Business ETL (pre-configured for the process)

Components function in conjunction with ScanWatcher for residual paper based invoices

Let's take a look...

# Benefits

- ✓ Reduce risk by improving accuracy
- ✓ Reduce manual processes
- ✓ Significantly reduce time and increase staff productivity
- ✓ Automate attachment of invoices to enhance audit functionality
- ✓ Streamline approval processes
